

# EXPRESSION OF INTEREST RIVERINA NEUROLOGY

## **Expressions of Interest for expanded Neurology services in Wagga Wagga**

Are you a recently or soon to be fully trained Neurologist with a love of clinical medicine, ready to join a highly supportive service with optimised lifestyle, financial and clinical exposure opportunities?

A mixture of private, VMO and fractional staff appointments can be accommodated for the right person

Riverina Neurology provides comprehensive Neurology services to the communities of South West NSW, with a catchment population of about 250,000. Wagga is a growing regional centre, with a council strategy to achieve a population of 100,000 by 2038. Equidistant between Sydney and Melbourne, it is a 1 hour flight or short drive to accessing 11 million of Australia's population.

Currently, permanent onsite general Neurology and specialist stroke services are complemented by visiting subspecialist consultative services in epilepsy, movement disorders and neurointervention/neurosurgery. The 350 bed Wagga Base Hospital is in the final stages of a \$480m redevelopment and supports the only non-metropolitan Neurology Advanced Trainee position in NSW. A 5 bed Acute Stroke Unit admits 400 patients annually with exceptional performance metrics. Weekly clinical/neuroradiology videoconferenced meetings with St Vincent's Hospital Sydney also provide a strong tertiary linkage.

18 subspecialist physicians call Wagga home, 3 of whom are senior examination panel members for the RACP clinical exam. 2 medical schools (UNSW and UNDA) provide the potential for academic or conjoint appointments. Teaching from student to Advanced Trainee level is core business.
