

Epilepsy Fellow – Austin Health

A 12-month full-time epilepsy fellowship is available for suitable adult or paediatric applicants at the Comprehensive Epilepsy Program of Austin Health, Melbourne. This fellowship provides the opportunity to work at an internationally recognised centre of excellence in epilepsy research and clinical care, receiving training in paediatric and adult epileptology and EEG. The program has particular strengths in seizure semiology and epilepsy classification, epilepsy genetics, advanced imaging, neuromodulation/epilepsy DBS, neuropsychology and stereo-EEG. Participation in a research project tailored to the applicant's interests is strongly encouraged, allowing fellows to experience the vibrant clinical research culture in the Austin Epilepsy Program.
