

## **Royal Brisbane and Women's Hospital (RBWH) Epilepsy Fellowship**

The Queensland Comprehensive Epilepsy Program, based at RBWH, is offering a 1 year Epilepsy Fellowship.

The Comprehensive Epilepsy Program at RBWH is part of the Hospital's Neurology Department. The program has a team of 7 epileptologists, led by Professor David Reutens. Facilities include 3 video-EEG monitoring beds for patients undergoing workup for epilepsy surgery and an active outpatient and ambulatory EEG service. In addition to several epilepsy clinics a week, there are specialty First Seizure, Women and Epilepsy and Transition clinics. The department also has 2 core training positions in neurology

The Fellow will receive training in all aspects of outpatient and inpatient care in adult epileptology from First Seizure to Epilepsy Surgery. This includes the daily care of patients undergoing inpatient video-EEG monitoring. The Fellow will also develop expertise in EEG and video-EEG interpretation and will be exposed to advanced imaging methods and neurogenetics of epilepsy.

In addition to the weekly epilepsy clinical meeting, the Fellow will have the opportunity to participate in the weekly neurology clinical meeting, journal club, neuroradiology meeting and medical grand round as well as attendance at Brain School. The Fellow is encouraged to attend relevant national and international meetings e.g. Epilepsy Society of Australia, ANZAN. The Fellow is expected to undertake a research project and academic staff within the program are affiliated with The University of Queensland's Centre for Advanced Imaging, Centre for Clinical Research and Queensland Brain Institute.
