

MMSC

The Royal Melbourne Hospital MS Centre is offering a 1-year MS and Neuroimmunology Fellowship. The position is accredited by the Royal Australian College of Physicians as non-core training in neurology.

The Royal Melbourne Hospital MS Centre is the home of an academic and clinical program supported by 8 neurologists, 2 fellows, registrar, and 4 research nurse coordinators. The program includes laboratory, clinical, applied and outcome research streams.

The fellow will receive specialist training in Multiple Sclerosis and Neuroimmunology, including diagnostics, indication and management of immunotherapies, clinical monitoring and symptomatic therapy. The fellow will also participate in Neuro-ophthalmology, Migraine and General Neurology outpatient clinics, and will receive training in MS and neuroimmunology – oriented clinical trials. This is a full-time clinical (50%) and research (50%) role and the fellow will develop and pursue research projects within our established research streams. Extension of the fellowship into a PhD program can be negotiated. The fellowship is supervised by A/Prof Tomas Kalincik, Prof Trevor Kilpatrick and Dr Mark Marriott.

The fellowship is suitable for an Australian or overseas trained neurology trainee with valid registration in Australia, who has completed core years of neurology training.

Applications will open in April 2020 (<https://melbournehealth.mercury.com.au/Default.aspx>).
