

Consultant Neurologist position in Greenslopes, Brisbane

QNeurology is looking for someone with passion for General Neurology. QNeurology is an established neurology practice serving Brisbane inner city, Southside and Bayside areas with long waiting lists.

QNeurology offers on-site new machines for nerve conduction study/electromyography as well as EEG clinics including ambulatory EEG with remote reading/reporting capability.

There are regular neuroradiology meetings as well as ample scope for teaching and research. It also features a state-of-the-art active infusion centre for patients requiring treatments such as IVIg. Being centred at the Greenslopes Hospital provides a multidisciplinary environment with all specialities and a diverse range of Neurology consults. There is an excellent support from other Neurology colleagues with plentiful opportunity for case discussions and professional assistance.

This role comes with flexibility of hours to suit to your personal and other professional commitments.
