

Neurologist Consultant

- Permanent Part time
- Monash Children's hospital, Monash Medical Centre Clayton

About the Role

An exciting, Paediatric Neurologist/ Epileptologist opportunity is now available at Monash Children's Hospital, Melbourne Australia. The physician will form part of a growing Paediatric neurology unit and provide care in inpatient and outpatient settings and EEG interpretation. Clinical activities will take place primarily at Monash Children's Hospital Clayton Campus with scope to expand to Casey Hospital. In addition to clinical care, participation in education and scholarly activity are desirable, with opportunities in quality improvement and advocacy as well.

About you

Qualified candidates must have a recognised medical degree and registered with the RACP, with specialization in Child Neurology. Subspecialty training in epilepsy/ EEG is preferred. The selected candidate will receive an honorary appointment in the Department of Paediatrics. There is ample scope to grow an area of practice interest or research.

About Monash Health

Monash Children's Hospital is a major paediatric hospital in Melbourne, Australia, with a new 230-bed Monash Children's Hospital to open in early 2017. Monash Children's is one of Australia's largest paediatric health services by volume of patients treated. While the tertiary site is based at Clayton, the hospital also encompasses wards contained within Dandenong Hospital and Casey Hospital. The hospital sits alongside Monash Health, Victoria's largest public health service, and has affiliations with Monash University Medical School, the Ritchie Centre and the Hudson Institute.

Applications close 2nd January, 2017
